

NC TUBE BENDERS

NC-38TSQ

- Hydraulic rotation of a single fixed radius bend die
- Hydraulic clamping of tube between bend die and clamp block
- Hydraulic actuation of pressure die
- Programming of the degree of bend and bending sequence is done on a 6" touch screen
- Software and control of machine functions done by PLC
- Store and recall bending angle and sequence data
- One step or two step bending operation
- Right or left hand bending available

- Pressure die boost system available as option
- Two step mandrel retraction with automatic mandrel lubrication
- Hydraulic filter detection and warning system
- Easily accessible multiple Emergency Stops
- Adjustable timing between motions
- Bending motion controlled by low speed positioning for maximum accuracy
